ABOUT DAIKIN

Daikin has a worldwide reputation based on over 80 years' experience in the successful manufacture of high quality air conditioning equipment for industrial, commercial and residential use.

Daikin Europe N.V.

ENVIRONMENTAL CONSCIOUSNESS

**In all of us,
a green heart**

Enhancing the present - safeguarding the future

Throughout the last 50 years or so the basic building blocks of life air, water and the earth - have been systematically subjected to increasing levels of pollution with little regard to their potentially devastating effects on future generations.

Recently however, concern has grown regarding climate changes, acid rain, water and air pollution and the constant degradation of Earth's natural resources. The very technology that created these problems is now being harnessed to halt and reverse them. Depletion of the ozone layer and global warming have been highlighted and are now being addressed. Government legislation prohibiting the use of toxic substances and the generation of pollutants has slowed down the destruction of the environment.

Daikin Europe is proud to have been pro active in this respect, closely following its Japanese parent in implementing policies that have often pre-empted official legislative codes and directives. As a result, a culture of "environmental management" has since 2001, played a key role in the company's day to day activities and development strategies.

Top management commitment is reflected in the establishment of a number of action plans, which are now strictly observed and implemented throughout the Daikin Group.

Multi Model applications

Air conditioning - creating a sense of well-being

Air conditioning has become part of our daily life, providing comfort everywhere - at home, in shops, restaurants, offices and hotels. In fact, it's hard to imagine life without it. Air conditioning generates that pleasant feeling associated with an atmosphere that is close to the ideal.

Air conditioning supplies pure cool air when it's hot outside. In winter or those cooler periods during spring and autumn, the heat pump can provide either cooling or heating.

Daikin air conditioning provides year round comfort and wellbeing for residential, commercial and industrial applications alike.

The basic facts about air conditioning:

cooling operation

outdoors indoors

- **Air conditioning for cooling**

Air conditioning works like a domestic refrigerator, continuously removing heat from the cabinet and discharging it into the kitchen. This 'free' heat can be experienced by touching the coil on the back of the refrigerator.

The principle of air conditioning is exactly the same.

A split system comprises an indoor and an outdoor unit, connected together by small copper tubing.

In summer, the indoor unit extracts heat from the room and exhausts it via the outdoor unit outside.

The indoor unit distributes cool air into the room, preventing unpleasant draughts and ensuring that the home remains cool and comfortable.

heating operation

outdoors indoors

- **Air conditioning for heating**

In winter, the reverse occurs. Natural heat, which is present in the outdoor air - even when it's freezing - is extracted and transferred indoors. Air conditioners that are able to heat and cool are known as heat pump systems. A heat pump cuts down on the use of a traditional central heating, allowing it to be switched off, possibly completely during spring and autumn.

- **Inverter technology**

The use of integrated inverter control ensures maximum **energy efficiency** by supplying only the required heating or cooling load where a standard non inverter unit would supply maximum load in an on/off regime.

The rapid start up time provided by the inverter increases **comfort** by reducing the lead time in obtaining the required indoor temperature. Once the required temperature is reached, the inverter unit continuously scans the room for small changes and adjusts the room temperature in seconds, thereby increasing comfort once again.

The benefits of a **Multi system**

- **Air conditioning in every room**

A Multi system allows up to 5 indoor units to operate off a single outdoor unit, thereby reducing installation space and costs. All indoor units can be individually controlled and do not need to be installed at the same time - extra units (up to a maximum of 5) can be added later.

- **The widest choice**

Different types of indoor units — wall mounted, concealed ceiling, floor standing etc - in different capacities can be mixed together in Multi system applications. Thus the ideal indoor unit can be selected for the bedroom, living room, office or wherever, according to the installation surface or personal requirements.

- **An ideal indoor climate**

A single outdoor unit can cool down or heat up a complete house, office or small shop at different times. A pleasant climate can be enjoyed whilst working at the desk in the afternoon, as well as a constant temperature in the living room and cool bedrooms in the evening.

Indoor units

for residential use

Daikin air conditioning introduces summer freshness and winter warmth into your home. Creating a perfect balance between temperature, humidity, purity and air movement... Daikin air conditioning is the modern, cost effective route to indoor comfort throughout the year.

Specifications

Indoor units

FTXG-E & CTXG-E

Wall mounted unit

Comfort

- Stylish and modern design
- Available in 2 colour variations
- Comfort mode reassures draught free operation
- Extremely quiet in operation

Filter

- Titanium apatite photocatalytic air purification filter powerfully absorbs microscopic particles, decomposes odours and even deactivates bacteria and viruses

Energy efficient

- ECONO mode decreases the power consumption so that other appliances that need large power consumption can be used
- Movement sensor automatically saves power consumption in unoccupied rooms

HEAT PUMP (air cooled)				FTXG25E-W/S	FTXG35E-W/S	CTXG50E-W/S

FLK/XS-B

Flexi type unit

Comfort

- Vertical auto swing and wide angle louvers ensure that warm air reaches the furthest corners of a room and increase the air flow coverage
- Extremely quiet in operation

Filter

- Air purification filter with photocatalytic deodorising function absorbs microscopic particles, decomposes odours and even deactivates bacteria and viruses

Energy efficient

- Home leave operation saves energy during absence

Flexible installation

- Allows both ceiling suspended as floor level installation

FVXS-F

Floor standing unit

Comfort

- Vertical auto swing and wide angle louvers ensure that warm air reaches the furthest corners of a room and increase the air flow coverage
- Extremely quiet in operation

Filter

- Titanium apatite photocatalytic air purification filter powerfully absorbs microscopic particles, decomposes odours and even deactivates bacteria and viruses

Energy efficient

- ECONO mode decreases the power consumption so that other appliances that need large power consumption can be used

Flexible installation

- Can be used for floor standing or lower wall applications
- As a floor standing model, it can be semi or fully recessed without loss of capacity

COOLING ONLY / HEAT PUMP				FVXS25F	FVXS35F	FVXS50F

FDK/XS-E/C

Slim concealed ceiling unit

Comfort

- Leaves maximum floor and wall space for furniture, decoration and fittings
- Extremely quiet in operation

Filter

- Standard suction filter removes airborne dust particles to ensure a steady supply of clean air

Energy efficient

- Home leave operation saves energy during absence

Flexible installation

- Can easily be installed in rooms with a false ceiling of only 240mm depth
- A standard external static pressure (ESP) of 40Pa, makes it possible to use flexible ducts of varying lengths

FDBQ-B & FBQ-B

Concealed ceiling unit

Comfort

- Leaves maximum floor and wall space for furniture, decoration and fittings
- Blends unobtrusively with any interior décor
- The position of the individual air discharge grilles can be altered, enabling a uniform temperature, even in irregularly shaped rooms
- Optimum air distribution
- Quiet in operation

Energy efficient

- Home leave operation saves energy during absence

Slim design for flexible installation

- Fits flush into narrow ceiling voids
- Only air suction and discharge grilles are visible
- The maximum external static pressure (ESP) is 88Pa for FBQ

FCQ-C

Round flow cassette

Comfort

- Year round comfort results from 360° radial air discharge with:
 - uniform air flow distribution
 - uniform temperature distribution
- Quiet in operation
- Less draughts and lower air velocities as a result of increased horizontal airflow

Energy saving

- Highest COP values
- Inverter technology

Flexible installation

- Very low minimum installation height of 214 mm
- Standard connection to D3-net without the need of an adapter PCB
- Easy condensate drain check

FFQ-B

4-way blow ceiling mounted cassette
(600mm x 600mm)

Comfort

- Automatic air flow director ensures uniform air flow and temperature distribution
- Excellent low draught characteristics and anti-ceiling soiling technology
- Extremely quiet in operation
- Modern style decoration panel in white (RAL9010)

Energy efficient

- Home leave operation saves energy during absence

Flexible installation and easy to maintain

- Due to the compact casing, it matches standard architectural modules of 600mm x 600mm, therefore ceiling tile cutting is no longer necessary
- Since the switch box is located inside the unit, it is easy to access from below for maintenance without removing ceiling tiles
- Possibility to shut off one or two flaps for easy installation in corners

FHQ-B

Ceiling suspended unit

Comfort

- Air flow distribution for ceiling heights up to 3.8m without loss of capacity
- A comfortable air flow in all directions thanks to an air flow pattern of 100°

Flexible installation and easy to maintain

- The ideal solution for installation without false ceiling since they are installed directly against the ceiling
- The reduced lateral servicing space enables the unit to be easily installed in corners and narrow spaces on walls and ceilings

Specifications

Outdoor units

MK/XS-E/F

- The Multi model application saves on outside space. The single outdoor unit can stand in the garden against an outside wall, or on the roof or terrace. Thus only enough space for 1 outdoor unit is required. This is aesthetically pleasing and simplifies installation.
- Daikin outdoor units are neat, sturdy and specially anti-corrosion treated to withstand severe weather conditions. They are fitted with a swing compressor, renowned for its low noise and high energy efficiency. Outdoor units are guaranteed not to disturb the peace and quiet of the neighbourhood.
- Multi inverter controlled outdoor units can operate with 2, 3, 4 or even 5 indoor units.

(1) Installation box for adapter PCB (KRP1C93) is necessary

(2) Possibility to connect an hour meter (field supply). This part should not be installed inside the equipment

Blank lined area for writing.

Daikin's unique position as a manufacturer of air conditioning equipment, compressors and refrigerants has led to its close involvement in environmental issues. For several years Daikin has had the intention to become a leader in the provision of environmental friendly products. This challenge demands the eco design and development of a wide range of products and an energy management system; which involves energy conservation and reduction of waste.

Daikin Europe N.V. is approved by LRQA for its Quality Management System in accordance with the ISO9001 standard. ISO9001 pertains to quality assurance regarding design, development, manufacturing as well as to services related to the product.

ISO14001 assures an effective environmental management system in order to help protect human health and the environment from the potential impact of our activities, products and services and to assist in maintaining and improving the quality of the environment.

Daikin units comply with the European regulations that guarantee the safety of the product.

Daikin Europe NV participates in the Eurovent Certification Programme for Air Conditioners (AC), Liquid Chilling Packages (LCP) and Fan Coil Units (FC); the certified data of certified models are listed in the Eurovent Directory. Multi units are Eurovent certified for combinations up to 2 indoor units.

The present catalogue is drawn up by way of information only and does not constitute an offer binding upon Daikin Europe N.V.. Daikin Europe N.V. has compiled the content of this catalogue to the best of its knowledge. No express or implied warranty is given for the completeness, accuracy, reliability or fitness for particular purpose of its content and the products and services presented therein. Specifications are subject to change without prior notice. Daikin Europe N.V. explicitly rejects any liability for any direct or indirect damage, in the broadest sense, arising from or related to the use and/or interpretation of this catalogue.
